OFFICE OF CURRENT INTELLIGENCE
18 April 1963

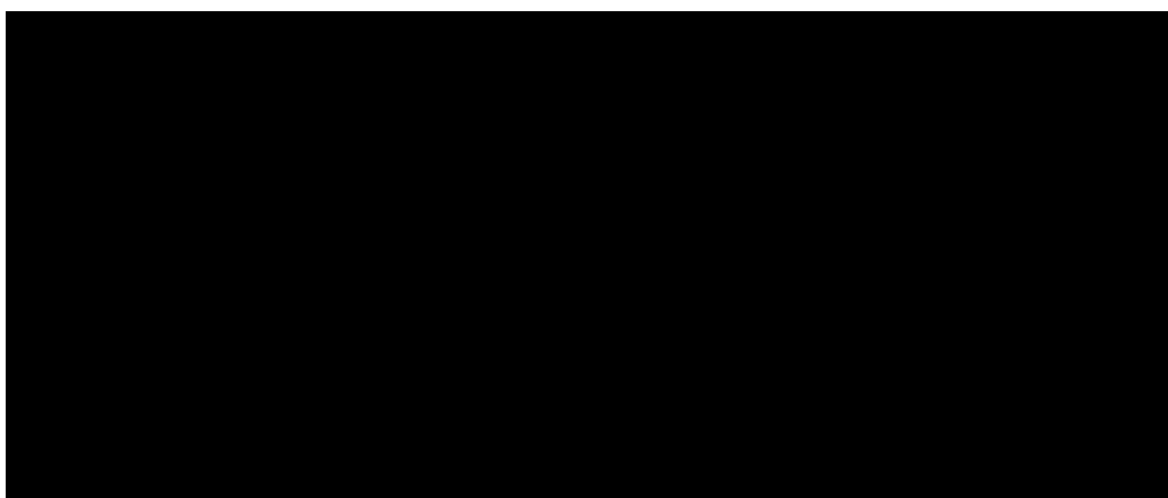

MEMORANDUM FOR: Director of Central Intelligence

SUBJECT : Revised Estimate of T-34 Tanks in the Cuban Revolutionary Army

1. DIA recently revised its estimate of the number of T-34 medium tanks in the Cuban Revolutionary Army, increasing the number from 210 to 450. Revision of this estimate was undertaken by DIA when well over 200 T-34 tanks were observed in parades held almost simultaneously in Havana and Santiago de Cuba in early January 1963. In addition, a few other T-34 tanks were located at Cuban military installations during the time of these parades.

2. CIA agrees that earlier estimates of the number of T-34 tanks in Cuban hands were low. We have reviewed all photographic and collateral evidence bearing on the problem with NPIC analysts, and we can now account for about 350 T-34 tanks. Great care was taken to avoid double-counting of these vehicles, and if there is an error in our figure, we feel that it is more likely on the low side.

5. In summary, we believe that our figure of about 350 T-34 tanks in the Cuban Revolutionary Army may be a conservative figure, while the DIA figure of 450 may be high.
